

ORIENTAL UNIVERSITY, INDORE

MCA II (AIML)

Practical File

Subject Name : Object Oriented Programming Using Java

Subject Code: CAAM5CO05

A Practical File Submitted

To

Faculty of Computer Science & Applications Oriental

University, Indore

Submitted To

Faculty Name

Dr.Sonal John

Submitted By

Name: Sangharsh Tiwari

Enrollment No. :-S255CAA050

Exp. ID.	Practical Learning Objective (PLO)	Date no.
-------------	------------------------------------	----------

1	Program to display Hello World and demonstrate structure of a Java program.	18-2-26
2	Program to demonstrate literals, keywords, variables & data types.	25-2-26
3	Program to demonstrate scope of variables (local, instance, static).	11-3-26
4	Program to demonstrate arithmetic, relational & logical operators.	18-3-26
5	Program using if-else & switch case.	1-4-26
6	Program to demonstrate command line arguments.	8-4-26
7	Program to create a class and object and call methods.	15-4-26
8	Program to demonstrate constructor and constructor overloading.	15-4-26
9	Program to demonstrate single inheritance using super keyword	22-4-26
10	Program to demonstrate multilevel inheritance.	22-4-26
11	Program to demonstrate method overriding (runtime polymorphism).	22-4-26
12	Program to demonstrate abstract class & final class.	6-5-26
13	Program to demonstrate interface and extending interfaces.	6-5-26
14	Program to demonstrate access protection (public, private, protected).	6-5-26
15	Program to perform operations on one-dimensional array.	13-5-26
16	Program to perform matrix addition using 2D array.	13-5-26
17	Program to demonstrate String & StringBuffer class methods.	20-5-26

18	Program to demonstrate wrapper classes (Integer, Double, etc.).	20-5-26
19	Program to demonstrate Object class methods (toString(), equals(), hashCode()).	20-5-26
20	Program to demonstrate try–catch–finally.	27-5-26
21	Program to demonstrate throw and throws.	27-5-26
22	Program to create user-defined exception.	27-5-26
23	Program to demonstrate object serialization & deserialization.	27-5-26
24	Program to create a thread by extending Thread class.	3-6-26
25	Program to create a thread using Runnable interface.	3-6-26
26	Program to demonstrate thread synchronization.	3-6-26
27	Program to demonstrate inter-thread communication (wait, notify).	3-6-26
28	Program to demonstrate reading & writing from console and file (Byte stream + Character stream in one program).	11-6-26
29	Program to create a simple AWT form with Label, Button, TextField and event handling.	11-6-26
30	Program to create a Java Applet demonstrating GUI components.	11-6-26
31	Program to demonstrate the Java Collections Framework using ArrayList, HashSet, and HashMap.	17-6-26
32	Program to establish database connectivity using JDBC and perform INSERT and SELECT operations.	17-6-26
